AIP Publishing*

Write it Right: How to Get Published and Be Read

Publishing is one of the most important parts of being a scientist, but it can also feel complicated. This session will guide participants through the entire research paper process, from the perspective of an AIP Publishing journal editor and staff. Whether you're preparing your first paper or looking to publish more confidently, this session will offer practical advice, examples, and insider tips from editors and the team at AIP Publishing.

Research Integrity and Publication Ethics: Building Trust in Science

Credible science depends on transparency, accuracy, and respect for others' work. This session introduces the core ideas of research integrity and publication ethics. Through live polls and discussion, participants will learn practical ways to strengthen the integrity of their research, protect their professional reputation, and contribute to a more trustworthy scientific community.
